Orgonomic and Chemical Cancer Research
A Brief Comparison

ORGONOMIC CANCER RESEARCH
1. The Cancer Cell.
Problem solved 1936-1940: Cancer cells arise from decomposed, decayed living tissues; they organize from orgone energy vesicles (bions). Cancer cells and ameba are functionally identical in that both arise from bionously disintegrated tissue. The cancer cell is the ameba of animal tissue; protozoa are the cancer cells of plant tissue.

Unit of the living is the bion (orgone energy vesicle).

2. The Cancer Tumor.
The cancer tumor is only one of many late symptoms of the systemic disease "CANCER BIOPATHY."

3. Background of Cancer as of 1943.
General and gradual loss of bio-energy in the diseased organism: Carcinomatous shrinking biopathy. Early symptoms: emotional resignation and deadness, pallor, secondary anemia, weak orgone energy field, symptoms of decay in excretions.

BIO-CHEMICAL AND GENETIC CANCER RESEARCH
1. The Cancer Cell.
Origin of cancer cell unknown: Research blocked by refusal to recognize the natural organization of protozoa and bacteria, due to the prejudice that the cell can only come from a cell.

Unit of the living is the nucleus-containing cell.

2. The Cancer Tumor.
The cancer tumor is the cancer disease proper.

Background unknown and, therefore, not investigated.
ORGONOMIC CANCER RESEARCH

Gradual loss of bio-energy in the blood system.
Blood tests developed in orgone biophysics 1938-1944 (disintegration test of red blood cells; autoclavation test; culture test; T-bacilli test). Excretions studied since 1937.

5. Experimental Reproduction of Cancer in Mice, 1936-1940.
Injection of T-bacilli obtained by different decay processes; period of development in mice 12-18 months by way of chronic inflammation. Injection of tumor pulp. Tar application results revealed to be T-bacilli effects. T-bacilli developed from coal bions.

6. Heredity.
Family heredity doubted. Pseudohereditary factor was recognized as given in anorgonic uterus and spastic pelvis with the result of a bio-energetically weakened embryo. Early emotional resignation in infancy.Disposition is thus prenatal.

7. Infectious Character.
Denied; T-bacilli are not infectious; they cause a slow chronic reactive inflammation followed by malignant cancerous developments.

8. Sexuality
In center of research as anorgonia and sexual resignation within total emotional resignation. Orgastic impotence universal. Functional bio-energetic approach.

9. Treatment and Prognosis.
Supplementation of bio-energy (= orgone energy) from the atmosphere through the orgone accumulator; charging of the blood system. Orgonically highly charged blood is the main therapeutic factor. It reaches all inner parts of the organism, acts beneficially against the putrefaction, charges the tissues bioenergetically, enhances turgor and metabolism, and directly attacks existent cancer cells. It is most effective in breast cancer even where initial glandular and bone metastases developed. Pain is reduced or eliminated. Life is at least prolonged in many cases if the decay process is not too advanced. Treatment of cancer tumors in soft tissue (liver, kidney, intestines) has a less good prognosis. Prevention of cancer before tumor appears through elimination of early putrefaction processes is preferable and very hopeful.
ORGONOMIC CANCER RESEARCH

Prognostically, any trend of the biosystem towards cancerous shrinking is early discernible by way of medical orgonomic diagnosis of the bio-energetic functions.
Psychiatrically, the emotional deadness and resignation can be attacked in some cases. On the whole, prognosis and treatment require ample further research.

10. Facilities.
Very poor. Budget at present $1500 to $2000 per month. Approximately $200,000 was spent in the course of 14 years; there is no hospital available to test the scope and efficacy of orgone therapy. Orgone therapy is sabotaged systematically by powerful cancer organizations and science editors. It is slandered and gossiped about by snipers of all kinds. (One cancer society official, for example, referred an editor who inquired about orgonomic cancer research to the smear article of the infamous sniper Brady.) Most researchers at the Orgone Institute do their work without pay and have to provide money from their own pockets.

11. Outlook.
Good; hopeful if the continual slandering of Wilhelm Reich's work can be stopped.

BIO-CHEMICAL AND GENETIC CANCER RESEARCH

10. Facilities.
During the past few years, bio-chemical and genetic cancer research was subsidized with about $10,000,000. All hospitals are open for research. The slightest hope is broadcast widely over the radio and is announced in the newspapers. The researchers are paid.

11. Outlook.
Poor, unless concepts of bio-energy, orgone-energy, biogenesis and biopathic shrinking are fully adopted with acknowledgment of the solution of the cancer riddle by Wilhelm Reich.
Projeto Arte Org
Redescobrindo e reinterpretando W. Reich

Caro Leitor
Infelizmente, no que se refere à orgonomia, seguir os passos de Wilhelm Reich e de sua equipe de investigadores é uma questão bastante difícil, polêmica e contraditória, cheia de diferentes interpretações que mais confundem do que ajudam.
Por isto, nós decidimos trabalhar com o material bibliográfico presente nos microfilmes (Wilhelm Reich Collected Works Microfilms) em forma de PDF, disponibilizados por Eva Reich que já se encontra circulado pela internet, e que abarca o desenvolvimento da orgonomia de 1941 a 1957.

Dividimos este "material" de acordo com as revistas publicadas pelo instituto de orgonomia do qual o Reich era o diretor.
01- International Journal of Sex Economy and Orgone Research (1942-1945).
02- Orgone Energy Bulletin (1949-1953)
03- CORE Cosmic Orgone Engineering (1954-1956)

E logo dividimos estas revistas de acordo com seus artigos, apresentando-os de forma separada (em PDF), o que facilita a organizá-los por assunto ou temas.
Assim, cada qual pode seguir o rumo de suas leituras de acordo com os temas de seu interesse.
Todo o material estará disponível em inglês na nuvem e poderá ser acessado a partir de nossas páginas Web.

Sendo que nosso intuito aqui é simplesmente divulgar a orgonomia, e as questões que a ela se refere, de acordo com o próprio Reich e seus colaboradores diretos relativos e restritos ao tempo e momento do próprio Reich.
Quanto ao caminho e as postulações de cada um destes colaboradores depois da morte de Reich, já é uma questão que extrapola nossas possibilidades e nossos interesses. Sendo que aqui somente podemos ser responsáveis por nós mesmos e com muitas restrições.

Alguns destes artigos, de acordo com nossas possibilidades e interesse, já estamos traduzindo.
Não somos tradutores especializados e, portanto, pedimos a sua compreensão para possíveis erros que venham a encontrar.

International Journal of Sex Economy and Orgone Research

Orgone Biologics

01 Walter Frank. Vegetotherapy 1942
International Journal of Sex Economy and Orgone Research Volume 1 Number 1 1942
Interval 70-92 Pag. 65-87

02 Wilhelm Reich. The Discovery of the Orgone 1941
International Journal of Sex Economy and Orgone Research Volume 1 Number 2 1942
Interval 12-36 Pag. 108-130

03 Wilhelm Reich. The Carcinomatous Shrinking Biopathy 1942
International Journal of Sex Economy and Orgone Research Volume 1 Number 2 1942
Interval 37-61 Pag. 131-155

04 Mary Robert. Shock Therapy as a Subjective Experience 1942
International Journal of Sex Economy and Orgone Research Volume 1 Number 2 1942
Interval 62-68 Pag. 156-162

05 Wilhelm Reich. The Natural Organization of Protozoa from Orgone Energy Vesicles (Bions) 1942
International Journal of Sex Economy and Orgone Research Volume 1 Number 3 1942
Interval 1-33 Pag. 193-255

06 William F. Thorburn. Mechanistic Medicine and the Biopathies 1942
International Journal of Sex Economy and Orgone Research Volume 1 Number 3 1942
Interval 65-66 Pag. 257-258

07 Theodore P. Wolfe. A Sex-Economic Note on Academic Sexology 1942
International Journal of Sex Economy and Orgone Research Volume 1 Number 3 1942
Interval 67-73 Pag. 259-265

08 Wilhelm Reich. Experimental Orgone Therapy of the Cancer Biopathy (1932-1943)
International Journal of Sex Economy and Orgone Research Volume 2 Number 1 1943
Interval 6-96 Pag. 1-92

09 Lucille Bellamy. Vegetotherapeutic Gymnastics 1943
International Journal of Sex Economy and Orgone Research Volume 2 Numbers 2 3 1943
Interval 49-55 Pag. 141-147

10 Theodore P. Wolfe. Mis Conceptions of Sex-Economy as Evidenced in Book Reviews 1943
International Journal of Sex Economy and Orgone Research Volume 2 Numbers 2 3 1943
11. Carl Arnold. A Theory of Living Functioning 1944
   International Journal of Sex Economy and Orgone Research Volume 3 Number 1 1944
   Interval 22-42 Pag. 17-37

   International Journal of Sex Economy and Orgone Research Volume 3 Number 1 1944
   Interval 79-84 Pag. 74-79

   International Journal of Sex Economy and Orgone Research Volume 3 Numbers 2 3 1944
   Interval 69-91 Pag. 175-187

14. Wilhelm Reich. Anorgonia in the Carcinomatous Shering Biopathy 1944
   International Journal of Sex Economy and Orgone Research Volume 4 Number 1 1945
   Interval 3-35 Pag. 1-33

   International Journal of Sex Economy and Orgone Research Volume 4 Number 1 1945
   Interval 102-102 Pag. 100-100

   International Journal of Sex Economy and Orgone Research Volume 4 Number 1 1945
   Interval 106-106 Pag. 104-104

17. Notes Editorial. Orgonotic Contact. Letter from a Reader 1945
   International Journal of Sex Economy and Orgone Research Volume 4 Numbers 2 3 1945
   Interval 81-82 Pag. 203-204

18. Wilhelm Reich. From the History of Orgone Biophysics 1947
   McF 207 Annals of the Orgone Institute, Number 1. 1947
   Interval 58-67 Pag. 108-126
