"COLD FACTS"

TIME, December 18, 1944, reports the following:

N.G.

Does it do any good to be inoculated against the common cold? This question has stumped the experts ever since the capsules, shots and sprays were introduced. Last week the American Medical Association's Councils on Pharmacy and Industrial Health gave their considered answer: there is still no proof that the vaccines do any good. Experiments on large groups of people show that the cold rates of those with and without vaccines tend to even up in the course of time. The A.M.A.'s official advice: no doctor should give cold vaccine except as an experiment; industrial groups should not be inoculated en masse.

TIME, January 22, 1945:

COLD FACTS

After a national runny-nose count, the indefatigable Dr. Gallup announced last week that 1) children under ten have nearly twice as many colds as people in their 20s, 2) more farmers (by a handkerchief's breadth) have colds than villagers and cosmopolites, 3) 21,000,000 citizens had colds between Dec. 15 and 22.

If one considers the common cold primarily an infection, then the attempt to cure or prevent it by means of capsules, shots and sprays seems entirely logical. If, as we do, one considers the cold essentially a sign of lowered biological resistance, of a decreased "organonotic potency" of the organism, it appears equally logical that such therapeutic and preventive methods must fail. On the other hand, experience over a number of years with the orgone accumulator shows conclusively that the basic factor is a lowered organonotic potency of the organism. It is the general experience of those who have an orgone accumulator that if they use it when they feel a cold coming on the cold either does not develop at all or lasts only a day or two, without developing serious proportions. This is even more true with regard to the general feeling of malaise than with regard to local symptoms. It is staggering to contemplate the amount of money wasted, in terms of working incapacity and useless medication, by 21,000,000 people with colds in one single week. For that money, an enormous number of orgone accumulators—which could prevent or cut short the colds—could be built. But before that time comes, the realization of the fruitlessness of present methods must become more widespread and with that the realization that there are no "miracle drugs" in medicine. Until medicine takes seriously the study of biological functioning and its disturbances, it will continue to discover and then to "debunk" one "miracle drug" after the other.

Redescobrindo e reinterprelando W. Reich

Caro Leitor
Infelizmente, no que se refere a orgonomia, seguir os passos de Wilhelm Reich e de sua equipe de investigadores é uma questão bastante difícil, polêmica e contraditória, cheia de diferentes interpretações que mais confundem do que ajudam.
Por isto, nós decidimos trabalhar com o material bibliográfico presente nos microfilmes (Wilhelm Reich Collected Works Microfilms) em forma de PDF, disponibilizados por Eva Reich que já se encontra circulado pela internet, e que abarca o desenvolvimento da orgonomia de 1941 a 1957.

Dividimos este “material” de acordo com as revistas publicadas pelo instituto de orgonomia do qual o Reich era o diretor.
01- International Journal of Sex Economy and Orgone Research (1942-1945).
02- Orgone Energy Bulletin (1949-1953)
03- CORE Cosmic Orgone Engineering (1954-1956)

E logo dividimos estas revistas de acordo com seus artigos, apresentando-os de forma separada (em PDF), o que facilita a organizá-los por assunto ou temas.
Assim, cada qual pode seguir o rumo de suas leituras de acordo com os temas de seu interesse.
Todo o material estará disponível em inglês na nuvem e poderá ser acessado a partir de nossas páginas Web.

Sendo que nosso intuito aqui é simplesmente divulgar a orgonomia, e as questões que a ela se refere, de acordo com o próprio Reich e seus colaboradores diretos relativos e restritos ao tempo e momento do próprio Reich.
Quanto ao caminho e as postulações de cada um destes colaboradores depois da morte de Reich, já é uma questão que extrapola nossas possibilidades e nossos interesses. Sendo que aqui somente podemos ser responsáveis por nós mesmos e com muitas restrições.

Alguns destes artigos, de acordo com nossas possibilidades e interesse, já estamos traduzindo.
Não somos tradutores especializados e, portanto, pedimos a sua compreensão para possíveis erros que venham a encontrar.
